WORK EXPERIENCE

Mutt Data

Data Engineer Lead

Feb 2025 - Present

- Lead end-to-end implementation of Machine Learning solutions.
- Currently, working on Image Recognition and Ad personalization with Generative AI.
- Research new technologies, their impact, and implementation within the company.
- Contribute to technical interviews, best practices definition, and mentoring processes.

Inviu

Cloud Data Engineer

Jul 2024 - Feb 2025

- Managed the end-to-end data lifecycle, implementing data lakes and data warehouses in the financial sector.
- Orchestrated data pipelines using dbt, Dagster, and Airflow, alongside Apache Redshift, Glue, and Spectrum.
- Deployed to the cloud and orchestrated containers with Kubernetes and EC2 on AWS.

Mercado Libre

Machine Learning Engineer

Nov 2023 - Jul 2024

- Designed and productized recommendation services for optimizing cloud billing (AWS and GCP).
- Developed and implemented CI/CD processes and defined best practices for the area.
- Technologies used: Python, Sklearn, Dask, Jenkins, Flask, Polars, BigQuery, AWS, GCP.

Data Engineer

Oct 2021 - Feb 2024

- Developed MVPs for the Applied Machine Learning team: CTR forecasting, recommendation systems, search and retrieval, Ads personalization.
- Performed discovery, framing, and evaluation of Machine Learning projects.
- Productized pipelines, ETLs, and machine learning models.
- Technologies used: Python, Sklearn, Dask, Flask, BigQuery, Hive, Presto, AWS, GCP.

Arriazu Macroanalistas

Digital Transformation Consultant

Feb 2021-Feb 2023

- Developed digital transformation strategies for the consultancy and its clients.
- Estimated financial models and automated trading tasks.
- Implemented optimization models for investment portfolio selection and machine learning for macroeconomic forecasts.
- Technologies used: Python, R, and MATLAB.

Novakorp

Software Solution Architect

Jun 2021 - Oct 2021

- Designed end-to-end data-intensive software solutions.
- Coordinated technical development for a team of 20 data engineers.
- Technologies used: Apache Spark, Cloudera, Apache Atlas, Hadoop, Scala, Python, and Gitlab.

Data Engineer

Feb 2021 - Jun 2021

- Developed pipelines for batch and streaming data ingestion.
- Managed diverse data sources, developed web scraping tools, and microservices.
- Technologies used: Apache NiFi, Python, Scala, Apache Kafka, Hadoop, and Hive.

Ministry of Production and Labor of Argentina

Data Analyst

2018-2019

- Systematized and integrated data sources for the National Open Data Program.
- Performed Data Analysis and developed spatial visualization tools.
- Technologies used: SQL, Python, R, QGIS.

EDUCATION

Universidad de San Andrés

2020

Master's degree (M. Sc.), Economics

- Quantitative oriented program: data analysis, machine learning, big data, econometrics, impact evaluation, spatial analysis and, computational simulation.

Universidad de Buenos Aires

2014 - 2019

Licentiate degree (B.A.), Economics

- Diploma with honors (cum laude)

TEACHING & OTHER ROLES

Data Engineering Professor, Coderhouse

2023 - Present

Teaching Assistant of Advanced Macroeconomics, UBA

2017 - 2021

Research Assistant, UTDT

2020

Teaching Assistant of Game Theory and Strategic Behavior, UdeSA

2020

Economic Advisor, Buenos Aires City Government

2018

Teaching Assistant of Social Sciences Methodology, UBA

2017

Teaching Assistant of Mathematics for Economists, UBA

2016 - 2017

LANGUAGES

- Spanish: native.
- English: business fluent.
- French: intermediate.
